

Chinese Rose

Rosa chinensis

Generated: 02-Dec-2025

The Chinese Rose is a perennial flowering plant admired for its vibrant colors, delicate fragrance, and ornamental value. Belonging to the genus *Rosa*, it is native to China and has been cultivated worldwide for centuries. The plant features woody stems with thorny branches and compound leaves. Its blooms, ranging from pink to red and white, are composed of multiple layers of soft, velvety petals arranged in a symmetrical pattern. Chinese Roses are often grown in gardens, floral arrangements, and landscaping projects. They thrive in well-drained soil under full sunlight and require regular watering and pruning to maintain healthy growth.
