

Mum

Chrysanthemum

Generated: 02-Dec-2025

Chrysanthemum, commonly known as Mum, is a perennial flowering plant cherished for its abundant blooms and cultural significance, especially in autumn. Belonging to the genus *Chrysanthemum*, it is native to East Asia. The plant features bushy stems, dark green leaves, and flowers in various colors, including yellow, white, red, and purple. Chrysanthemums are widely cultivated for ornamental gardens, floral arrangements, and festivals. They prefer full sunlight, well-drained soil, and regular maintenance to encourage flowering. Mums symbolize longevity, joy, and optimism.
